BORIS MUNTYANU  
Update

Have a good day miro lacho phrala Gratan!

I was very happy last evening having a telephone conversation with you. In my opinion will be easier for you to find decision of housing for my family if summary of this very important question will be suggested.

1. At present moment I cant to apply for housing, because as was informed will be more difficult to develop this question when my family will be here. Therefore at present moment I am living to my friends from church and waiting my family that will come to England during next 6 weeks (from this Monday).

2. My younger daughter Lili (9 years old) recently finished treatment in the Hospital with diagnosis: Pielonephritis (kidneys). Will be necessary to have medical assistance 2 times in a week. Will be impossible to do this in Southampton because Paediatric Nephrological Dispenser it is located in London.

3. My older daughter Olga recently finished very successfully musical school (pianist). However in Southampton not exist Musical College. She has reference letter to Royal College of music that located in London.

4. My wife Svetlana is the professional nurse. The all programmes for nurses

in the context of programme refuge nurse as well only in London (I have this

information from British Medical Association as participant of programme

"Refuge Doctor"). She will have possibility quickly to pass those programmes

and to begin she's professional activity in any health projects for Romany/Travellers Community.

5. About myself. On 9 June I will pass my test of English. Despite of my

contract

of honorary clinical doctor observer in Southampton General Hospital I will

not have possibility to be deeply involved in programme Refuge Doctor because in this city absent this. London it is better place for my next step in

the process of becoming as registered specialist by General Medical Council.

6. My family having a housing in London will give me possibility to be more useful in Romany/Travellers Movement in this country, in the World as whole without any doubts.

Pralo Gratan, I will be very thankful to you, if you will correct my letter, and will give assistance in negotiations with Gypsy Welfare Comity and British Gypsy Council for supporting of my family in the process of my claiming for housing in London

But baht thy sastipe!

Boris
